

Switching BESS optimizer: the process

How Ra Energy moved to Flower
– without taking its assets offline

1. Trigger

Performance falls short

Trading revenues below expectations, with limited insight into what drove them.

Independent testing

Soltech Energy benchmarks optimizers on performance, market access and portfolio.

2. Benchmarking

3. Decision

Partner chosen, notice served
Flower selected on performance and partnership; the existing agreement is terminated.

Parallel integration

Flower's in-house team runs integration alongside the old setup – the BESS keeps earning.

4. Integration

5. Prequalification

Fast-track TSO approval

Svenska kraftnät approval via the new “Förnyad bedömning” process.

BRP change & switch

Market Intelligence handles the BRP formalities and times the switch. Live by end of 2025.

6. Go-Live

The Result

+30%

higher revenues,
spring 2026
